CAPSTONE PROJECT

The Battle of Neighborhoods (Week 1)

Introduction

Chennai, is the capital of the state of Tamil Nadu, located in the south-east coast of India. Along with having the third-largest expatriate population in India, it has also been named as one of the top 10 cities to visit in the world by a number of tourism magazines and websites.

However, with the increase in visitors from all over the world, it is imperative that the city be able to cater to a varied palette. Also, since the Indian cuisine, with its strong flavor, is not a very sustainable eating source for most westerners, the need for restaurants catering continental cuisine arises.

Therefore, my idea for the IBM Data Science Capstone Project is to explore the varied cuisines of restaurants in Chennai, India and determine which would be optimal location to start one.
